Monday, January 28, 2019

- Warm-up
  - Write the process for solving a system of equations using the substitution method.

① Solve for a variable (may already be done) in one equation

② Substitute that into the other equation and solve

③ Substitute that answer into the first equation and solve

- Solving Systems of Linear Equations
The Tale of Two Truckers
10-3
The Elimination Method

Objectives:
Content: I will solve systems of equations using the elimination method.
Social: I will use my time wisely and stay focused.
Language: I will write my solutions and interpretations clearly.
