

How the Internet Works: Routing & DNS

Journal:

- How do you feel about talking in front of a class?
- Explain why you think you feel that way.

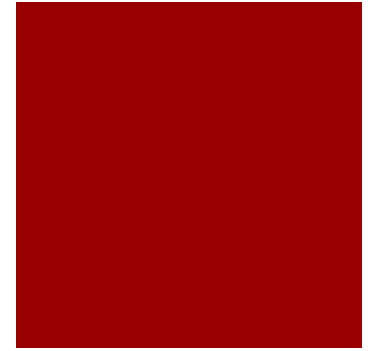

What did you learn from Mr. Thomas's seeing the server closet.

Objectives:

- Students describe characteristics of the Internet that influence the systems built on it.
- Students explain how computers can be used to get a web page from a new web server.
- Students work as part of a collaborative group using effective communication to accomplish a task

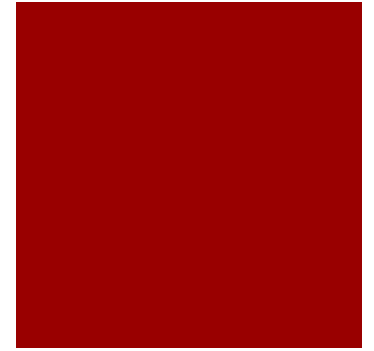

A little bit of improvisation on a Friday

□ How to: <https://www.youtube.com/watch?v=MUO-pWJ0riQ>

Get Set

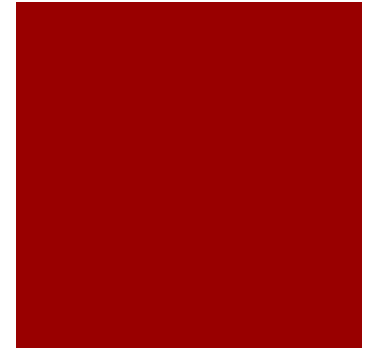

□ List necessary device to “act out” the internet

□ In small groups create the “rules” to that device (no more than 25 words – enough to explain the purpose, leaving room for improvisation)

Go...

Applying DNS
