Intelligent Paper Directions

I am a highly intelligent piece of paper.
Let's play a game. You are my peripheral. Follow my directions exactly.

I am X, and I go first.

Move 1: Put an X in any corner

Move 2: Look in the opposite corner to my X
IF the other player did not go there
THEN put an X in the opposite corner
ELSE put an X in any free corner

Move 3: Look to see if any line already has 2 X's and one blank space
IF there are 2 Xs and a space in a line
THEN put an X in that space.
ELSE IF there are 2 Os and a space in a line
THEN put an X in that space.
ELSE put an X in any free corner.

Move 4: repeat the directions from Move 3

Move 5: Put an X in any free space.
